Short and flush.
Straight and clean cuts with the Cutter for Flexible Hoses and Plastic Conduit Pipes.

- for clean cutting of thin-walled plastic pipes up to Ø 25 mm and flexible hoses, also fabric-reinforced, made of plastic and rubber
- straight and clean cut without deformation

KNIPEX Quality – Made in Germany
Clean and fast cutting of flexible hoses and plastic conduit pipes.

Straight and clean cut without deformation – this can be done easily with the new KNIPEX Cutter for Flexible Hoses and Plastic Conduit Pipes.

This compact tool has a wedge-shaped blade which cuts rubber and plastic so smoothly that there is no need to trim the cut edges. This saves a lot of valuable time. Practical: the high-strength special steel blade is replaceable.

Cutter for flexible hoses and plastic conduit pipes with wedge-shaped blade:
- for clean cutting of thin-walled plastic pipes (e.g. plastic clad pipes) and flexible hoses, also fabric reinforced (e.g. for compressed air), made of plastic and rubber
- not suitable for cutting cables
- no additional work needed on the cut edges
- with opening spring and locking lever
- tool made of tough, fibreglass reinforced plastic
- blades made of high-strength special grade steel, oil-hardened

Cuts straight and clean without deformation
