

The right tool for a lot of cutting.

Cable shears with opening spring.

- ▶ for fatigue-reduced cutting of copper and aluminium cables
- ▶ ergonomically designed for relief of the arm muscles
- ▶ clean and smooth cut without deformation

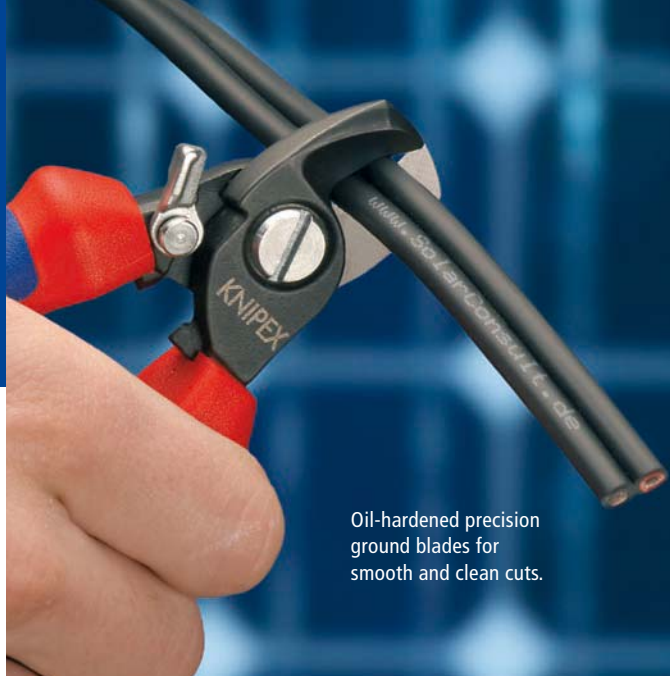

NEW

KNIPEX Quality – Made in Germany

A more comfortable way for repetitive cutting.

A small spring with great effect.

The opening spring positions these KNIPEX cable shears comfortably in the user's hand. This relieves the forearm muscles. If a lot of cables have to be cut in quick succession, for example for new installations in blocks of flats, the supporting effects of the opening spring are very noticeable: electrical contractors save valuable energy and are able to work longer and with less fatigue.

Oil-hardened precision ground blades for smooth and clean cuts.
